Michael Steurer

Local Energy Communities and Chambers' experience

LECs in the context of STEEEP

steEEP
Support & Training for an Excellent
Energy Efficiency Performance

- LEC Estonia
- LEC Madrid
- LEC Nice
- LEC Marseille
- LEC Var
- LEC Croatia
- LEC Piemonte
- LEC Latvia
- LEC Timis county

- 9 Local Energy Communities
- 7 Countries

Activities and achievements

Collective actions

- Exchange of good practice
- Joint energy audits and management (ISO 50001)
- Acquisition and joint use of RES technology
- Joint procurement of consultation services
- Joint procurement of solar panels
- Joint electricity purchases
- Development of smart grid solutions
(feasibility studies on intercompany smart grids)

Lessons Learnt

- Participating companies need to dedicate a sufficient amount of time and budget for developing LECs
- Existing communities can serve as nucleus for LECs
- Involved companies should have similar characteristics and needs
- Start by building a favourable framework for investments
- Working with partners and multipliers is the key for success
